

The 2022 Snowmass Bred Maiden Sale

August 9 – September 15, 2022

The 2022 Bred Maiden Sale

We are excited to offer you 54 females in this year's bred maiden sale. As was the case in our first bred maiden sale last year, we will sell a maximum of half of these females during the sale period. This ensures that whether you are the first or last buyer to purchase an animal in the sale, you will select from a deep pool of animals with superior genetics. ***Unlike last year, this year's sale begins with your receipt of this catalog.*** If you see an animal you would like to own, you can purchase it right away. Our contact information appears on the last page of this catalog.

The females offered are currently being exposed or confirmed bred to our top herdsires, including the 2022 and 2019 AOA Supreme National Champions Snowmass D'Angelo and Snowmass Global Solutions, Judges' Choice Winners Snowmass Lovers Spartan and Snowmass Divine Majesty, and the sire of the high-selling animal in this year's Parade of Champions auction, Snowmass Smokin Waves, among many others. We are committed to offering you our best genetics. Thank you for your consideration of the lovely females in this year's sale.

This Year's Sale Structure

There are 54 females offered in this year's sale, of which we will sell a maximum of 27. **You may purchase a female anytime from now through September 15, 2022 or until we reach our sale limit, whichever comes first.** All females will be confirmed bred or breeding to the service sire listed and come with a fertility guarantee and, should it prove necessary, rebreeding as described in the terms on page 29.

Financing is available for up to one year.

Pricing

GREEN: Females listed in green are priced at \$6,000

GREY: Females listed in grey are priced at \$8,000

GOLD: Females listed in gold are priced at \$10,000

PURPLE: Females listed in purple are priced at \$12,000

Purchasing

We will accept offers to purchase animals via live phone call, text or email. Please do not leave phone messages as these may not be received in a timely fashion. Animals will be sold on a first-come, first-serve basis and we will provide up to 60 days free agistment post confirmation of your female's pregnancy to give you time to make transportation arrangements to bring her to your farm.

Lynn Edens: lynn@lcfalpacas.com 917-952-5184

Susanne Bienenstock: Susanne@lcfalpacas.com. 914-318-0893

Viewing

We would be happy to show you females in which you are interested. Please contact us to make an appointment to visit our Canastota and/or North Salem farms.

Choosing

We've included some lists organizing the females by sire, service sire, color genotypes and other characteristics to help you sort through the group. These appear on pages 23 through 28.

Interpreting A Female's Sale Listing

Listing Text Color tells you the price of the female

1. Snowmass Purely Fictitious (C)

Sire: Snowmass Fictione
Dam: Snowmass Nonesset
DOB: 8/14/20
Color: Light Brown
Color Genotype: EE AA

The female's **location** is indicated by a C (Canastota) or an N (North Salem.)

Service Sire
Snowmass Imaginarius
Color Genotype: Ee Aa
Status: Confirmed
Due Date: July 2023

	AFD	SD	%>30	Curv	SL	FW
22 Grid Hist	17.9	4.1	0.6	52.2	4.5	5.5
2020 EPDs	-1.30	-0.42	-4.75	2.75	1.20	0.42

Grid histograms are based on analysis of combined shoulder, mid-side and hip samples and capture more of the variation in the fleece than do histograms based on the mid-side alone.

Where the maiden was old enough to have **2021 EPDs** calculated, they appear in the table's second row.

Stretched staple length (inches) and fleece weight (lbs) are taken from 2022 shearing evaluations.

COLOR GENOTYPING:

Genotypes for **MC1R** are denoted with E's (capital or small according to the mutations present) and genotypes for **ASIP** are denoted with A's. Visit the American Alpaca Journal page of Snowmassalpacas.com to read articles on color genotypes in Issues 6 and 7, or contact Lynn and Susanne to learn more.

The Maiden Group At A Glance

Use the tables here to quickly compare the sale lots based on what we believe are their particular phenotypic and/or genotypic strengths. We have used the same price color-coding here so that it is easy to scan the group for animals with certain attributes at a given price point. Animals with few highlighted boxes may still be great all-rounders. "Bred For Color" means a 50 to 100% chance of non-white or -light offspring from the current breeding.

Service Sires' Particular Strengths At A Glance

Here and on the next page we have listed the service sires to which the maidens in the sale have been bred or exposed and note for which attributes we consider them particularly prepotent or valuable in the same manner we did for the maiden females on the previous pages. Here, though, there is no meaning to the blue or gold color shown.

Name	Color	Covers Black	No Dilution	++ Fineness	++ SSL	++ Uniformity	High Curv /Crimp	++ Density

Breeding and Sale Terms: Read These

- When you agree to purchase an animal from the bred maiden sale we will provide you with our standard sales contract which includes the opportunity for a veterinary inspection as well as a standard fertility guarantee for the female.
- If you intend to keep your female at a farm located in the United States, you may at your option finance her purchase for one year. There will be no interest charged. We will require four equal quarterly payments, the first of which will represent your deposit.
- You may leave your female at our farm until 60 days post-confirmation of her pregnancy at no additional charge. She will stay with the service sire or, when that is not possible, a high-quality cover sire to help ensure she is pregnant when she leaves.
- Because our females are pasture bred, their exact due dates are uncertain. The date shown as the due date in this catalog represents the earliest the female could be due based on when she was introduced to the service sire's field. You should expect delivery of the cria within a couple of months of that date.
- If your female is confirmed pregnant but fails to deliver a live cria, you may return her during our next breeding season to be rebred to the same sire or the closest alternative we have available for breeding at that time. We reserve the right to define and choose the closest alternative male in cases where the same sire is not available for the rebreeding. If you expose her to another male in the interim, this rebreeding offer is null and void, but our fertility guarantee is unaffected.
- It is possible that a female may not be pregnant at the close of our breeding season in late November. If yours is not, you will take her to your farm for the winter and arrange to return her to us during our next breeding season to breed to the male to which she was exposed or the closest available alternative male, which we again reserve the right to define and choose. If you expose her to another male in the interim, this breeding offer is null and void, but our fertility guarantee is unaffected.
- Our breeding season at the Canastota farm runs from the last week in June until the end of November each year. We will not be able to accept females for breeding or rebreeding in Canastota outside of that time period.
- Our breeding season in North Salem runs from the third week in May until the end of December each year. We will not be able to accept females for breeding or rebreeding in North Salem outside of that time period.

To Purchase, Please Contact:

Lynn Edens

lynn@lcfalpacas.com

917-952-5184

Susanne Bienenstock

susanne@lcfalpacas.com
